DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first and second paragraphs of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-11 and 13-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The new limitation directed to "selectively introduce hydroxyl groups" in claims 1 and 2 (and claims 3-11 and 13-17 by dependency) does not find support in the specification as filed. The locations cited by applicants have been reviewed, but no discussion of the concept of selective introduction can be found.

3. Claims 1-11 and 13-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The meaning of the new limitation directed to "selectively introduce hydroxyl groups" in claims 1 and 2 (and claims 3-11 and 13-17 by

Art Unit: 1713

dependency) cannot be determined because the nature of the selectivity has not been disclosed. In the event that applicants merely intend for the word "selectively" to refer to the introduction of hydroxyl groups without cross-linking and degradation, then the clause including "selectively" is redundant in the claim because the introduction of hydroxyl groups without cross-linking and degradation is expressly stated. However, applicants' argument in traversal of the rejection over Stemke implies that the claimed selectivity would require some degree of preferential introduction of hydroxyl groups over other groups, such as the carboxyl groups disclosed in Stemke. For this meaning, the claims are furthermore indefinite because no indication of the degree of selectivity is provided.

Claim Rejections - 35 USC § 102

4. Claims 1, 8-10 and 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Stemke (US 4,891,146) for the reasons set forth in item 4 of the Office action mailed 12/21/2006.

5. Claims 2, 3, 5-9 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stemke (US 4,891,146) for the reasons set forth in item 8 of the Office action mailed 12/21/2006.

6. Applicant's arguments filed 3/21/07 have been fully considered but they are not persuasive. Applicants argue that Stemke does not disclose the selective introduction

Art Unit: 1713

of hydroxyl groups, and instead introduces an excess of carboxyl groups. As stated above, the concept of selectivity has been neither discussed nor defined in the specification, particularly with respect to the introduction of carboxyl groups. Therefore, since the clause including "selectively" is both indefinite and unsupported in the specification as filed, it cannot serve to exclude the reference examples as a reference against the claims. The new limitation regarding degradation is not seen to affect the rejection because no degradation appears to result from the reference method.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

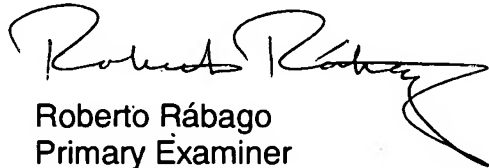

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
